

Sustainable Development Goals

(Version of 1 December 2025)

Deutsche Börse SDG Report 2025

Financial Year 2024

Within the framework of the 2030 Agenda for Sustainable Development, the United Nations have defined 17 goals for global sustainable development (SDGs). These aim to drive sustainable development on a global level and were put into action starting on 1 January 2016. Deutsche Börse Group remains committed to supporting the achievement of these goals.

With our strategic focus and operations, we either support, or actively contribute to the achievement of the goals. We seek to enable our customers to participate in the green transition, to promote transparency and trust throughout our operations and to foster a transparent and inclusive approach to sustainability. This is reflected in our five key sustainability matters that guide our sustainability efforts:

Climate	Contribute to the Paris Agreement with our long-term climate strategy, net-zero target and transition plan
Employees	Attract external talents, ensure internal skill development, commit to an inclusive workplace and foster equal opportunities for all employees.
Business Conduct	Exhibit ethically sound behaviour in all our business activities
Stakeholder Engagement	Create national and international networks and collaborations to promote dialogue and sustainability projects
ESG Business	Support the green transformation of our customers through our comprehensive ESG data, products and infrastructure offering

We have defined the SDGs for which there is a concrete and material connection to our own operational activities or by the use of our products and services by customers. We have broadly mapped our key sustainability matters to those defined SDGs for which we have contributed using the global indicator framework for the SDGs and targets of the 2030 Agenda.

Our support and contributions are outlined in our FY2024 Annual Report and can be found within the references listed below:

Key Matters	SDGs	Core references
 Climate	 	Sustainability Statement: Information on environmental matters (ESRS E1) Environmental Protection Statement ESG Reporting Guide
